

AFTER SCHOOL MARTIAL ARTS PROGRAM

As you know, training in Karate builds self confidence and self control. It develops concentration and coordination. And here at Competitive Edge Martial Arts Training Center, we promote positive social, physical and intellectual development for all our students. We have worked in the area of child instruction for the last 30 years. All of the coaches and child supervisors are personally hand-picked by me. I have trained each one so there is no worry about who is working with your child and what he/she may be learning.

The basic rundown of the program is this: We pick up your child at their school when school gets out. We bring them to the Karate school (Competitive Edge Martial Arts Training Center). Their time here will include time for snacks, games, quiet time for homework and, of course, Martial Arts training.

Children routinely make great gains and benefits training on a 2 day a week basis. Think of what it will be on an everyday basis. They will progress faster up the belt ranks than usual. We will vary what occurs in the After School Martial Arts Program so that your child will not suffer "karate burn out."

Our Program runs from 3:00pm (or whatever time the school lets out) until parent pick-up (no later than 6:00pm). Competitive Edge Martial Arts After School Karate Program operates on the Upper Dublin School District calendar. Our program will be closed on all school holidays and school closings due to inclement weather. We provide coverage for scheduled early dismissals with no additional charge. However, school closing and holiday camps are offered for an extra fee.

How to get signed up is this:

1. Reserve your spot by sign up on our website (www.CompetitiveEdge.cc), Make sure your child's name, your child's school name and your contact information is given. (Note: When we get an idea of how many kids will be enrolled, we'll be able to finalize transportation and classes)
2. When accepted into our program, we will go over with you and your child what is expected of him/her, especially in the area of picking them up at school.
3. Pay for your child's registration fee
4. First month tuition due the 1st of the starting month

We are very excited about the program. This fills a need for parents and with the Martial Arts training, the returns are far greater than any other program can deliver. This provides a tremendous service for you and your child - we will work with your child until you get off work and your child gains self confidence, self control, greater hand-eye coordination, concentration and knowledge of self defense.

You can't get a better deal than this anywhere!
